

How do I change the order of pages and sections?

If you want to change the *Page or Section Order* and move your new page/section into a different position;

1. Click on Page/Section Order

2. Scroll down to the bottom of the list and highlight the name of the page you want to move
3. Use the arrows on the right side of the pages field to move the page up or down. You will need to continue to click on the arrow; it will eventually appear in the window.
4. Once the page is in the desired position, click on the **Save** button.
